PROFESSIONAL SUMMARY

Results-oriented Data & Systems with 4+ years of experience in operational data analysis and process optimization. Expertise in bridging the gap between raw data and strategic insights for non-technical leadership using SQL, Python, and R. Proven track record of leveraging ETL pipelines and LLMs to support evidence-based decision-making in government and technical sectors

---

CORE COMPETENCIES AND TECHNICAL SKILLS

Category	Specific Skills & Evidence
Data Analytics & Visualization	Power BI (Advanced DAX & Git Version Control), Tableau, R (Statistical Modeling), Python (Pandas, NumPy, Scikit-learn), Data Visualization.
Database & Engineering	SQL (T-SQL, SSIS), ETL/ELT Automation, REST API Integration, Cloud Cost Data Consolidation, Legacy System Migration.
Strategic Intelligence	KPI Development, Policy Impact Analysis, Technical Mentorship/Training, Requirements Elicitation, Ethical Data Analysis.
Governance & Quality Assurance	Git Version Control, Data Governance, User Acceptance Testing (UAT), SDLC Support, Metadata Tracking.

PROFESSIONAL EXPERIENCE

Machine Learning Developer Intern, Government of Alberta

June 2025 – Present

- Automated ETL pipelines from 4+ SQL databases using SSIS, integrating thousands of daily row entries and reducing manual reporting efforts by 5+ hours/week.
- Modernized financial infrastructure by consolidating multiple legacy Cloud Cost Invoice dashboards into a single unified enterprise dashboard for executive decision support.
- Improved data accuracy from 80% to 99% by migrating legacy hard-coded data transformations to scalable SQL models, virtually eliminating manual labeling errors.
- Pioneered Power BI Git Version Control implementation to track workspace changes and metadata, enhancing auditability and team collaboration.
- Developed Python-based ETL scripts to pull data from REST APIs, streamlining pre-processing and exploratory data analysis (EDA).
- Engineered a fallback anomaly detection feature within SQL databases to automatically flag mislabeled resources, allowing developers to resolve data entry issues before they impact reporting.
- Implemented Row-Level Security (RLS) for invoice reporting to ensure strict data privacy and role-based access compliance for diverse business units.
- Led Requirements Elicitation and UAT for new financial dashboards, translating stakeholder needs into technical specs and securing sign-off.
- Resolved historical cost anomalies in customer-facing data to establish a "Single Source of Truth" for departmental financial reporting.

Communication Lead Technician, ASCCI - North Inc.

August 2021 – August 2024 (3 years - Full-time)

- Delivered Tier-2 Technical Support and system troubleshooting for telecommunication infrastructure, analyzing operational metrics to improve service reliability.
- Authored Standard Operating Procedures (SOPs) and technical documentation to standardize service delivery and support organizational Change Management.
- Prevented stockouts and ensured continuous uptime by analyzing historical consumption trends to direct resource planning and inventory logistics.

Machine Operator, Silent-Aire

October 2020 – July 2021 (9 months - Full-time)

- Ensured strict adherence to quality standards and production tolerances, supporting process improvements that increased throughput.

EDUCATION

- **Diploma with Honors, Data Analytics, NAIT (Sept 2024 – Apr 2025)**
    - Coursework: Statistical Learning, Machine Learning, Data Preparation, Data Visualization, Data Governance
- **Diploma with Honors, Electronic Engineering Technology, NAIT (2018 – 2020)**

KEY PROJECTS AND ACHIEVEMENTS

Cloud Cost Invoice Consolidation & Governance, Government of Alberta

- Architected a unified Power BI reporting solution that consolidated fragmented legacy cloud cost data into a single enterprise dashboard.
- Automated data ingestion using Python-based API integrations to ensure real-time financial reconciliation and cost tracking.

Power BI Git Version Control Implementation, Government of Alberta

- Established a robust data governance framework by integrating Git Version Control into the Power BI development lifecycle.
- Enhanced collaborative workflows by enabling change tracking, version history, and metadata management for all departmental reporting assets.

Edmonton Housing Analytics Capstone, NAIT

- Executed an end-to-end analytics pipeline (ingestion, cleaning, modeling) to deliver actionable community insights and identify wellness trends for sponsors.
