PROFESSIONAL SUMMARY

Machine Learning Developer with strong experience in applied analytics, AI automation, and enterprise data solutions within the public sector. Proven ability to design reliable data pipelines, evaluate AI systems, and deliver practical, human centric AI solutions aligned with governance and business needs.

CORE COMPETENCIES AND TECHNICAL SKILLS

- **Data Analytics & Visualization:** Power BI (Advanced DAX & Git Version Control), Tableau, R (Statistical Modeling), Python (Pandas, NumPy, Scikit-learn), Data Visualization.
- **Database & Engineering:** SQL (T-SQL, SSIS), ETL/ELT Automation, REST API Integration, Cloud Cost Data Consolidation, Legacy System Migration.
- **Strategic Intelligence:** KPI Development, Policy Impact Analysis, Technical Mentorship/Training, Requirements Elicitation, Ethical Data Analysis.
- **Governance & Quality Assurance:** Git Version Control, Data Governance, User Acceptance Testing (UAT), SDLC Support, Metadata Tracking.

PROFESSIONAL EXPERIENCE

Machine Learning Developer Intern, Government of Alberta

June 2025 – Present (Full-time)

- Resolved enterprise data misallocation across 28 projects and over 3.5 million transactions by engineering a rule-based SQL anomaly detection feature, establishing new organizational tagging standards that automatically mapped dynamic keywords to correct project codes.
- Automated data ingestion from 4+ SQL databases by architecting scalable ETL pipelines using SSIS, integrating thousands of daily row entries and reducing manual reporting efforts by 5+ hours per week.

- Modernized financial infrastructure by consolidating multiple legacy Cloud Cost Invoice dashboards into a single unified enterprise dashboard for executive decision support.
- Improved data accuracy from 80% to 99% by migrating legacy hard-coded data transformations to scalable SQL models, virtually eliminating manual labeling errors.
- Enhanced auditability and team collaboration by pioneering Power BI Git Version Control, tracking workspace metadata and ensuring strict data governance across diverse business units.
- Developed Python-based ETL scripts to pull data from REST APIs, streamlining pre-processing and exploratory data analysis (EDA).
- Implemented Row-Level Security (RLS) for invoice reporting to ensure strict data privacy and role-based access compliance for diverse business units.
- Improved the output reliability of an AI-powered PDF reviewer web application by identifying, analyzing, and resolving ~15% of system anomalies, collaborating directly with developers to refine the model's accuracy.

Communication Lead Technician, ASCCI-North Inc.

August 2021 – August 2024 (3 years - Full-time)

- Standardized operational service delivery and accelerated onboarding by authoring comprehensive technical documentation and training 10 new and non-technical employees on equipment operation, ensuring strict adherence to organizational procedures.
- Delivered Tier-2 Technical Support for telecommunication infrastructure by troubleshooting complex system issues and analyzing operational metrics to improve service reliability and uptime.
- Authored Standard Operating Procedures (SOPs) and technical documentation to standardize service delivery and support organizational Change Management.
- Prevented hardware stockouts and ensured continuous uptime by analyzing historical consumption trends to dynamically direct resource planning and inventory logistics.

Machine Operator, Silent-Aire

October 2020 – July 2021 (9 months - Full-time)

- Ensured strict adherence to quality standards and production tolerances, supporting process improvements that increased throughput.

EDUCATION

Alberta AI Academy (Levels 1 - 3), Government of Alberta

- Completed advanced, hands-on AI training program focused on real-world government use cases.
- Developed skills in prompt engineering, AI agent design, workflow automation, and enterprise AI deployment.
- Collaborated in cross-functional groups to design and release production-ready AI applications.
- Applied human-in-the-loop AI practices emphasizing safety, oversight, and measurable productivity improvements.

Diploma with Honors, Data Analytics, NAIT

- Coursework: Statistical Learning, Machine Learning, Data Preparation, Data Visualization, Data Governance

Diploma with Honors, Electronic Engineering Technology, NAIT

KEY PROJECTS AND ADVANCED ANALYTICS INITIATIVES

AI Chatbot Intent Analysis, Government of Alberta

- Evaluated AI chatbot intent accuracy and user satisfaction by parsing and analyzing 5,000 unstructured JSON conversation logs, utilizing Python to map system outputs against user inputs and extracting actionable product insights.

Edmonton Housing Analytics Capstone, NAIT

- Facilitated strategic real estate decisions for project sponsors by executing an end-to-end analytics pipeline on housing inventory, translating complex datasets into actionable "data stories" and presentations for non-technical stakeholders.
